# Chemstop™

Latex Supported glove w/cotton-jersey liner

#L8230

Latex-dipped, wrinkle-finish palm on a cotton-jersey support. The Chemstop™ provides the comfort and flexibility of an unsupported glove, in a supported one that's tough and long-wearing. And, because latex withstands a wide range of temperatures, gloves can be used in both moderately hot and cold situations. (Latex stays flexible and durable between -18°C and 149°C (0°F -300°F).) These gloves are very popular in the commercial fishing industry because of their excellent grip, high dexterity and good abrasion resistance. And, the inner cotton-jersey liner significantly reduces heat transfer, while keeping hands dry and comfortable by absorbing perspiration.
