Kevlar® Cut-Resistant String-Knit Gloves

#SK

Kevlar® is considered the most important man-made fiber discovery since nylon. No other fiber has its unique combination of properties. It provides excellent protection against both cutting hazards and burn hazards, while being lightweight and comfortable. Kevlar® will not melt or drip on contact with open flame. Superior manufactures a variety of Kevlar® string knit gloves to cover a range of needs. Most are 7-gauge string knits that offer excellent cut and slash resistance, making them ideal for handling metal stampings, glass and other sharp-edged materials while providing seamless comfort and dexterity.

To limit the risk of allergic reactions, all of our Canadian-made gloves are now crafted with latex-free materials.
