FIRE SIMULATOR TRAINING

Pyrosoft safety training uses a simulator to re-create live fire situations. Students will learn how to handle a fire extinguisher and put out a fire properly. Fire extinguisher training increases workplace safety by providing employees with the skills and knowledge needed to respond quickly and efficiently to a fire emergency.

PYROSOFT BENEFITS

- Instructor-Led Training

FIRE
Simulation Software
Find the model that's right for you.

OFFICE

FLICKER

Flicker is designed for people that want complete hardware customization. This basic system comes with all of the software and equipment you need – just download to your computer, hook up to your projector and you're ready to go!

FLARE

This entry-level simulator is perfect for small fires. It's light-weight, compact and affordable, allowing you to train your staff on how to safely deal with a fire emergency in the office.

The lightest, smallest and most economical models. These portable systems are ultraportable and excellent for training in a small-business setting.

INDUSTRIAL

FIREFLY

Mid-sized and packed in a roomy, hard-sided case, this rugged model can be shipped anywhere easily. Its display screen is large enough to provide challenging, meaningful training on a variety of industrial fire scenes.

FIREBIRD

If you are a professional fire trainer, this is the model for you. It's loaded with all of the software features a professional would ever need and its light and durable case carries the largest screen in its class.

These industrial-grade fire simulators are ideal for large workplaces. Create fire scenes that are every bit as challenging and immersive as the real thing. Ideal for large workplaces.

ENTERPRISE

FLASHPOINT

Insert flames inside, behind, below and above any object with our Ultimate version of Flameware. This challenging software teaches students to use proper techniques as they navigate five difficulty settings. Flashpoint is ideal for companies looking for advanced emergency preparation.

FLAMESCAPE

The most advanced and largest fire simulator available – anywhere. Flamescape's large screen delivers breathtaking fire scene images in true-to-life size and resolution. We selected the best of the best to make this an amazing multimedia experience; it's so much more than fire simulation.

The Enterprise line is equipped with two additional sensors and a compressed air hookup to ensure your team is getting the best training possible. Ideal for corporations and military organizations that have thousands of employees to train.
