

WORK HARD BREATHE EASY

Honeywell Healthcare Respiratory Protection Solutions

Honeywell's respiratory protection solutions offer maximum comfort and reliable protection from hazardous airborne irritants. With world-class fit and reliability to keep workers safe and productive, and with training and educational material to help workers make safer choices on their own, Honeywell provides protection for every breath you take.

WORKING TO PROTECT YOUR WORKERS

Honeywell offers reliable, comfortable, and user-friendly respiratory personal protective equipment (PPE)—designed to minimize the inhalation of airborne contaminants so you can have confidence in your equipment during high-risk situations. With long-standing expertise in respiratory protection and a deep understanding of worker needs, Honeywell engineers respiratory protection solutions for the most hazardous environments.

RESPIRATORY PROTECTION GUARANTEED

Honeywell's respiratory protection solutions guarantee compliance, comfort, ease-of-use, durability, enhanced work productivity, and, importantly, safety. As a leading manufacturer of respiratory protection products, Honeywell has been protecting workers against respiratory hazards in many different environments around the world for over 100 years. Honeywell is committed to ensuring that PPE products are being placed quickly and cost-effectively in the hands of those most in need—including first responders and medical professionals.
